

AQUABUG™ Automatic Pool Cleaner

**It's Got A Face
You'll Grow
To Love**

AQUABUG™

AQUABUG™

Automatic Pool Cleaner

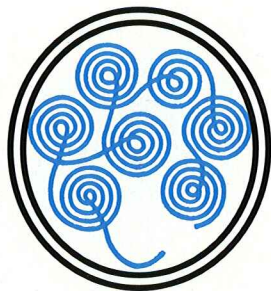

You'll never be bugged by manual pool cleaning again.

The AquaBug provides you with easy, trouble-free operation. You never need to empty or replace debris bags. And because AquaBug works with your existing filtration system - no extra energy consuming booster pump is required. Everything for simple 10 minute or less installation is included - even the hoses.

This bug loves to circulate.

Plus, AquaBug improves water circulation by acting as a moving main drain, pulling water from the bottom of your pool as it moves. Your water circulates and your pool stays cleaner - without the overuse of chemical sanitizers.

The exclusive AquaPilot® programmed steering system means AquaBug won't miss a spot!

It's got a face you'll grow to love.

The AquaBug automatic pool cleaner from Arneson. After you see how easily and effortlessly it keeps your pool clean, it will be love at first sight.

This bug hangs out with a smart crowd.

As part of a complete family of superior quality products designed to keep your pool at its sparkling best, AquaBug is the smart alternative to the drudgery of manual cleaning. And it's from Arneson, the company that engineered automatic pool cleaning technology.

AquaBug automatic pool cleaner from Arneson.
